**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-2, drawn to a dermal papilla cell growth promoter.

Group II, claim 3, drawn to a compound of formula I.

Group III, claim 4, drawn to a dermal papilla cell growth promoter of formula II.

Group IV, claim 5, drawn to a dermal papilla cell growth promoter of formula IX.

Group V, claim 6, drawn to a hair growth stimulant.

Group VI, claim 7, drawn to a method of stimulating hair growth.

Group VII, claim 8, drawn to use of a compound.

Group VIII, claims 9-10, drawn to a method of screening a dermal papilla cell growth promoter.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Formula I, II, IX and the corresponding R and X groups (to numerous to list here).

Applicant is required, in reply to this action, to **elect a single species (with a single group corresponding to each R or X)** to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

If elected the following species election must be made:

Group I must elect a single species of formula I, II or IX.

Group II must elect a single species of formula I.

Group III, must elect a single species of formula II.

Group IV, must elect a single species of formula IX.

Group V, must elect a single species of formula I, II or IX.

Group VI, must elect a single species of formula I, II or IX.

Group VII, must elect a single species of formula I, II or IX.

Group VIII, must elect a single species of formula I, II or IX.

The following claim(s) are generic: Claims 1-10.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Groups I, III, IV, V, and VIII all relate to a 'dermal papilla cell growth promoter', while Groups II, VI and VII do not. Further, the compound of formula I is known in the art and is taught by US 3, 687,982 and EP 0606044 A1 and as such the Groups are not linked to form a single inventive concept.

A telephone call was not made to Applicant because the restriction/election was so complicated and as such the restriction/election is submitted in writing.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
